PROFESSIONAL SUMMARY

Java Full Stack Developer with 3.5+ years of experience in backend and frontend development. Skilled in Java, Spring Boot, Microservices, React JS, SQL, and building enterprise applications. Strong expertise in the financial domain with proven contributions across the full software lifecycle — from requirement analysis to coding, testing, and deployment and integrating AI solutions using Spring AI.

SKILLS

Programming: Java, React JS, Angular, SQL
Frameworks: Spring, Spring Boot, Microservices, Hibernate, Junit, JWT, Spring AI
Frontend: React JS, HTML, CSS, jQuery, JavaScript, Bootstrap
Databases: MySQL, MongoDB, PostgreSQL, Oracle
Tools: Kafka, REST APIs, Git, Maven, Docker, Tomcat, AWS, Kubernetes, Agile, CI/CD, Postman

WORK EXPERIENCE

Software Engineer
Symplocos Solution Ltd **March 2022 – Present**

Project 1: Mortgage-Backed Securities Engine (MBSE) Developed a solution to process Mortgage-Backed
. Securities (MBS) pass-through certificates from Ginnie Mae, Fannie Mae, and Freddie Mac.
• Built modules including Trade Entry, Assignment, Give-Up, and Allocation for completing the trade life cycle.
• Integrated Kafka for real-time trade messaging and Tomcat for deployment. Automated validation, allocation, and
. reporting processes, improving processing efficiency and reducing manual errors.
• **Responsibilities**: Analysis, coding, unit testing, bug fixing, and implementation of change requests.
• **Tech Stack**: Spring Boot, Spring MVC, JPA, Kafka, Tomcat, React JS, Sybase, Maven, Git, Docker. .

Project 2: Liquidity Risk Infrastructure (LRI) Enhanced and automated liquidity risk reporting capabilities for
. enterprise-level financial reporting.
• Designed and executed the User Experience Tier and Liferay-based portal as the face of the platform..
. Collaborated with QA to resolve defects and ensure compliance with quality standards and timelines.
• Built display templates and dashboards for liquidity metrics and reports.
• **Responsibilities**: Requirement analysis, development, bug fixing, and portal customization.
• **Tech Stack**: Java, Spring, J2EE, RESTful APIs, jQuery, Liferay.

Software Engineer
Amtech Incorporation ltd -As Intern **April 2021 – March 2022**

Project: Market Scraper created a stock market scraper portal using Java and react, improving data retrieval speed by 40% and delivering real-time updates with <2s latency for 1,000+ users. Designed REST APIs and MySQL for storing and analyzing market trends.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science **April 2015 – June 2018**
Vikram University M.P.
Relevant Course: Data Structures & Algorithms, Database Management, Cloud Computing, Web Development

Diploma In Computer Application (DCA) **April 2015 – March 2016**
MCRPV Bhopal (M.P.)
Learned software troubleshooting, debugging, and problem-solving in real-world scenarios Achievements

Masters of Sociology (M.A.) **July 2018 – October 2020**
Vikram University M.P.
